

HOW DO YOU WASH A FACE MASK?

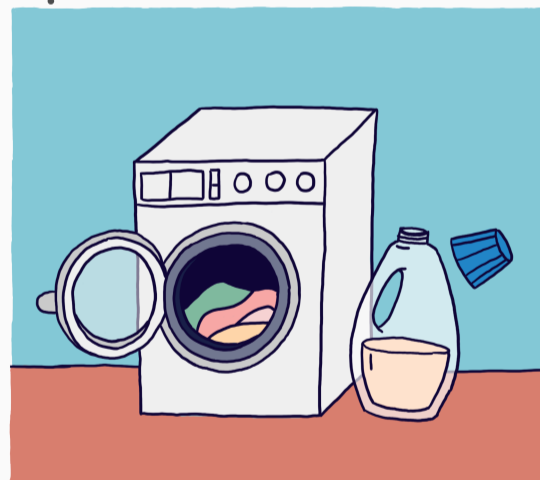

1 Place used face masks in a sealed cloth bag. Wash the bag with the mask.

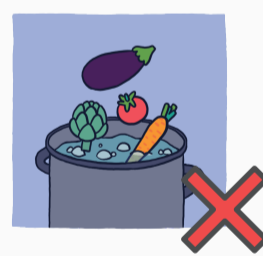

Wash it with detergent in the washing machine at 60°C with the rest of the laundry.

Or boil it in a cooking pot.

Have you washed the face mask at too low a temperature? Then iron it at a high temperature.

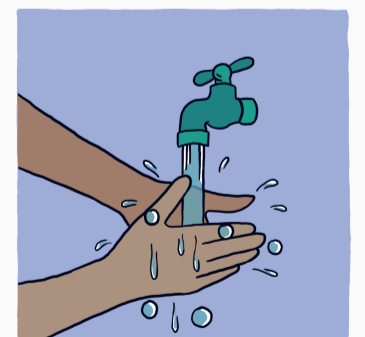

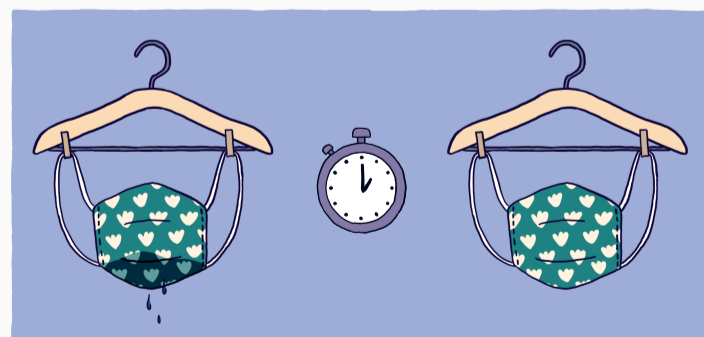

Only use the cooking pot for the face masks.

2 Do you want to use the mask again? The mask has to be completely dry first.

Have you touched a dirty mask? Then definitely wash your hands thoroughly.

**SET THE GOOD EXAMPLE,
STOP THE VIRUS.**
